We were able to complete all our stories by the deadline time.

We knew that our critical path was the IN-7 story branch so we prioritized this task, having people work on it from the start in order to prevent any blockers from stopping future tasks. Also, we had people who had to utilize new frameworks and APIs, so they were given one main large task with much easier other tasks to do. This is because they needed more time to learn and work on their main task to finish it and would have less time to finish their other tasks.

We also again had someone get the Covid-19 vaccine which meant he was unable to work for a few days so we scheduled his work to allow for it to be blocked when he was away because he wouldn't be able to work even if they were blocked.
